remains healthy and ready to move to foster home

11/10/2025

11/10/2025 by Rachel Macdonald

Showing no symptoms consistently. Has been mixed with kitten that still has the odd sneeze. Ideally these kittens move to foster and not to gen pop. Due to the nature of the isolation room I am not comfortable with these cats re-entering gen pop until all the kittens have been 7 days symptom free. They ideally should go to foster.

Treatments Next Due

Ayradia

125 mg/mL Metronidazole oral suspension
0.7 mL PO (by mouth) twice a day (BID)

12/04/2025 – Overdue

Clavamox drops

62.5 mg/mL Amoxicillin/clavulanic acid oral suspension
0.5 mL PO (by mouth) twice a day (BID)

11/16/2025 – Overdue

Revolution

Selamectin topical
Topically every 30 days (Q30D)

12/07/2025 – Overdue

Treatment History

Ayradia

125 mg/mL Metronidazole oral suspension
0.7 mL PO (by mouth) twice a day (BID) for 7 days
Notes: diarrhea. G- but highly suspicious. treating with panacur and metro

11/28/2025 - 12/05/2025 – In Progress

Panacur/Marquis

Fenbendazole oral suspension, Ponazuril oral suspension
PO (by mouth) once a day in the evening (SID (PM)) for 5 days
Notes: Give ____ every 24 hours for 5 consecutive days

11/28/2025 - 12/02/2025 – Complete

Clavamox drops

62.5 mg/mL Amoxicillin/clavulanic acid oral suspension
0.5 mL PO (by mouth) twice a day (BID) for 14 days
Notes: to treat oral ulcers due to calicivirus

11/03/2025 - 11/16/2025 – In Progress

Pyrantel pamoate

50 mg/mL Pyrantel pamoate oral suspension
PO (by mouth) once
Notes: Pyrantel pamoate liquid is a well-known parasiticide and dewormer. It controls strongyles like blood worms, palisade worms, sclerotomes (red worms), pinworms, hookworms and roundworms. Pyrantel dewormer for dogs exclusively treats parasites in the gastrointestinal (GI) tract because it is not fully absorbed into the bloodstream.

08/27/2025 – Complete

Doxycycline

50 mg/mL Doxycycline hyclate oral suspension
0.08 mL PO (by mouth) once a day in the evening (SID (PM)) for 10 days

08/16/2025 - 08/25/2025 – Complete

Revolution

Selamectin topical
Topically every 30 days (Q30D) for 1 years
Notes: FLEA PREVENTION: Adopters should continue some type of flea prevention on their own, every 30 days

08/09/2025 - 08/04/2026 – In Progress

Pyrantel pamoate

50 mg/mL Pyrantel pamoate oral suspension
PO (by mouth) once
Notes: Pyrantel pamoate liquid is a well-known parasiticide and dewormer. It controls strongyles like blood worms, palisade worms, sclerotomes (red worms), pinworms, hookworms and roundworms. Pyrantel dewormer for dogs exclusively treats parasites in the gastrointestinal (GI) tract because it is not fully absorbed into the bloodstream.
